COLLAGEN SUN

SKIN CARE AND TANNING

- **HYBRID: TANNING AND SKIN CARE IN ONE**
- **STIMULATION OF ELASTIN AND COLLAGEN PRODUCTION**
- **ATTRACTIVE AND NATURAL TANNING OF THE SKIN**

Tanning and skin care in one

Hapro Collagen Sun offers skin care and tanning at the same time. The most recent innovative tanning technology -also referred to as 'hybrid tanning'- is now available for the private sector. This tanning appliance comprises Collatan® lamps, an advanced light technology in which red light skin care therapy is combined with UV light. The Hapro Collagen Sun is more than just a sun bed. The benefits of red and UV light combined into an ideal mix for beauty and well-being.

Skin care

The red light stimulates the production of collagen and elastin, boosting the elasticity and flexibility of the skin and making the skin stronger. The tanning process is accelerated because the red light enters deep into the skin. This stimulates the blood circulation and intensifies the tanning process, leading to excellent tanning results without needing a higher dose of UV light.

Comfort

A comfortable lying area, a large tanning tunnel with ergonomic design, user-friendly control panel and refreshing body cooler make the Hapro Collagen Sun a comfortable wellness experience at home.

Two models

The Hapro Collagen Sun is available in two models. The Hapro Collagen Sun 24 has 24 Collatan® lamps. The Hapro Collagen Sun 26/5 has 26 Collatan® lamps and five 25 Watt Seecret collagen boosters for additional skin care in the face area. Both tanning appliances are available in the trendy colour Pearl White.

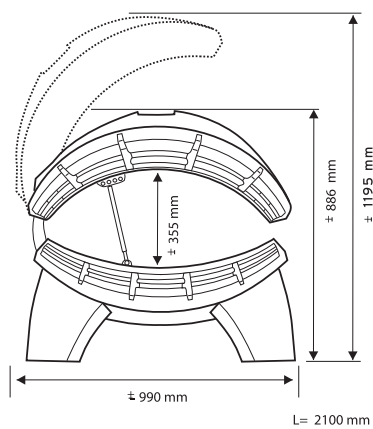

- **BETTER SKIN BLOOD FLOW**
- **MAINTENANCE-FRIENDLY**
- **A COMFORTABLE, LARGE LYING AREA**
- **A LUXURIOUS BEAUTY AND WELLNESS EXPERIENCE AT HOME**
