*\*Weights sold separately*

### **SLS500**

#### **Pro ClubLine - Leverage Squat**

Build mass and strength in the thighs, glutes, and calves with Body-Solid's SLS500 Leverage Squat. Engineered to eliminate the risks of squats, the SLS500 enhances the benefits, increases effectiveness and carries a full commercial rating, making it perfect for any facility. A biomechanically correct angled squat platform ensures peak effectiveness and safety through the exercises. A rounded calf block also provides extra range of motion making the SLS500 an ideal machine for those serious about overall leg development. Plate storage horns allow for smart weight plate management and an oval 11-gauge steel frame ensures stability and sturdiness throughout the exercise.

Dimensions: 74" L x 61" W x 67" H  
Weight: 398 lbs.
