

SCHILLER
BIKE A BLUE PLANET

A photograph of the Golden Gate Bridge in San Francisco, California. The bridge's iconic red-orange towers and suspension cables are prominent against a clear sky. The bridge spans across a body of water, with a rocky, brownish hillside visible on the right side. In the background, a small white building sits on a rocky outcrop in the water. The overall scene is bright and clear.

“AFTER 10,000 YEARS OF PADDLING ACROSS A PLANET THAT IS MORE THAN TWO-THIRDS WATER, THE TIME HAS COME FOR A NEW ERA OF WATER BIKING. SO MANY BODIES OF WATER - LET'S HAVE FUN AND RIDE THEM ALL.”

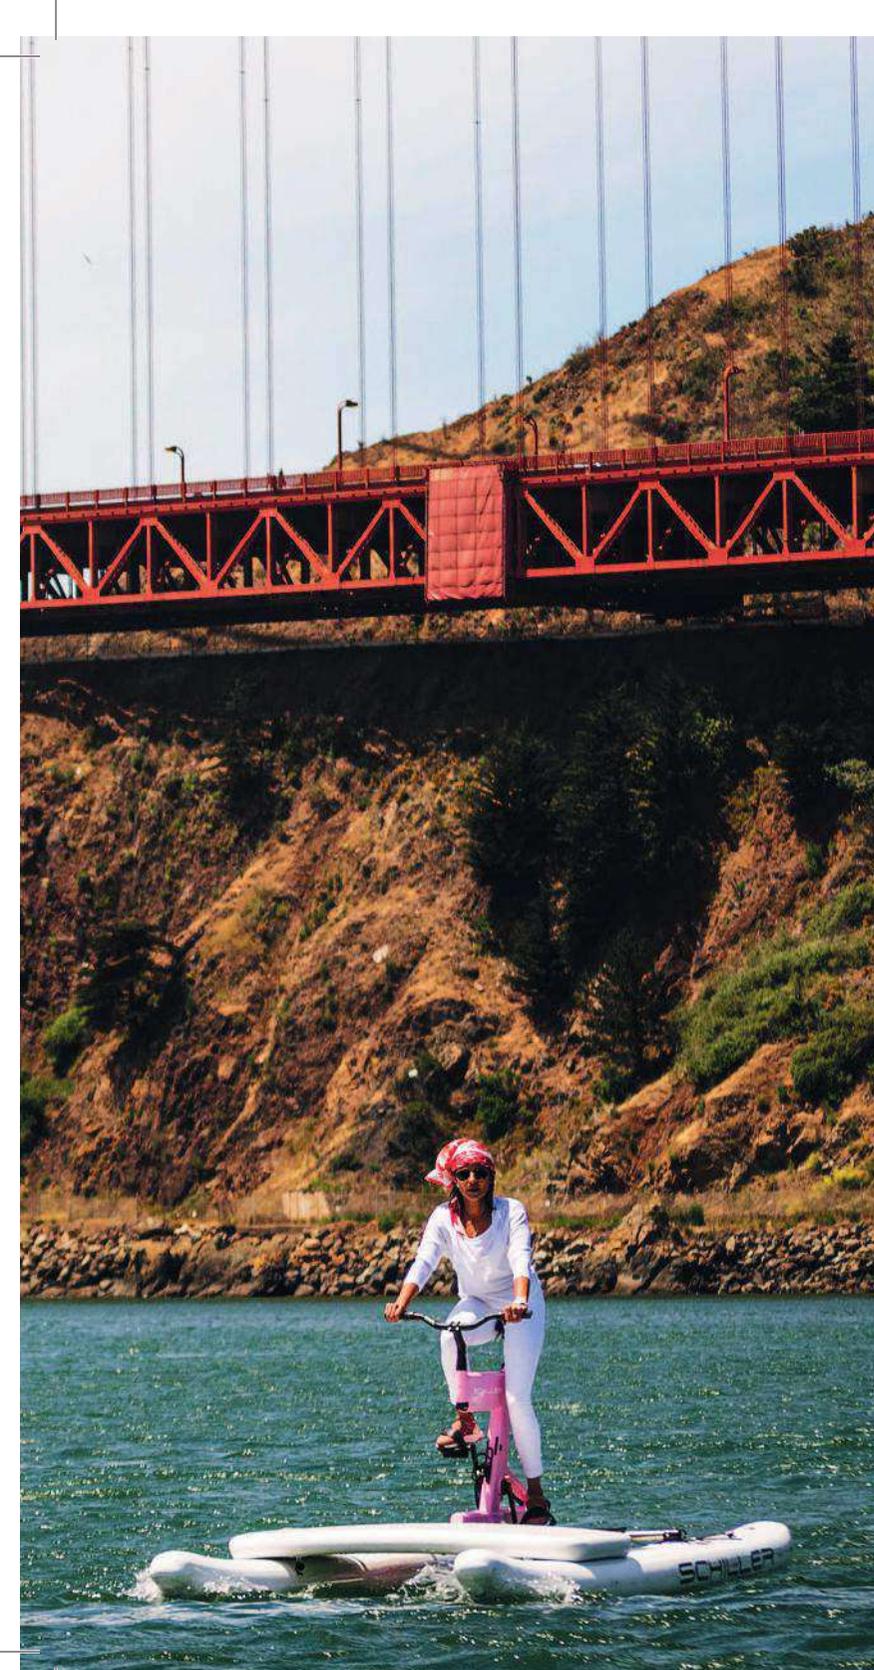

Jessica Schiller - CEO & Founder of Schiller Bikes

ENGINEERED FOR SPEED DESIGNED TO TAKE YOUR BREATH AWAY.

Founded in 2013, Schiller Bikes is pioneering a new frontier in water biking. A hybrid of premium bike-meets-ultra portable catamaran, the revolutionary S1-C is truly in a class of its own. With cruising speeds of 4-5 mph and top speed at over 8 mph, the S1-C gives people of all ages and athletic abilities an exhilarating bike ride on the open water for fun, fitness, and exploration.

Biking over the water, riders have a unique “glass bottom” view of an aquatic world below. Designed for salt water, the S1-C employs a proprietary drive train that enables riders to easily create forward thrust with a high degree of maneuverability, even in reverse. Featuring Gates Carbon Drive belts, integrated steering and propulsion, and an array of accessories, the S1-C delivers a silent, smooth and incredibly fun cycling experience across the water. Rugged, inflatable pontoons ensure maximum rider safety on the water while also enabling easy stowage of multiple bikes.

The S1-C is ergonomically designed with interchangeable bike components (saddle, handlebars, cranks, and pedals) and a variety of color combinations. With nearly one billion bikes around the globe built for land, Schiller Bikes is singularly focused on the majestic rides, trailblazing voyages, and incredible sunset spins across the water.

SCHILLER

Take the ride of your life with the world's best water bike. A sublime combination merging modern design, technology, and precision engineering, the S1-C water bike delivers an unparalleled cycling experience on oceans, lakes, rivers, and canals around the world.

DESIGN FEATURES

Premium stainless steel and anodized components throughout

Ultra low drag outdrive featuring a specially optimized propeller design

Integrated steering on handlebars

Rugged, high pressure, drop-stitch pontoons

Performance saddle, handlebars, cranks and pedals

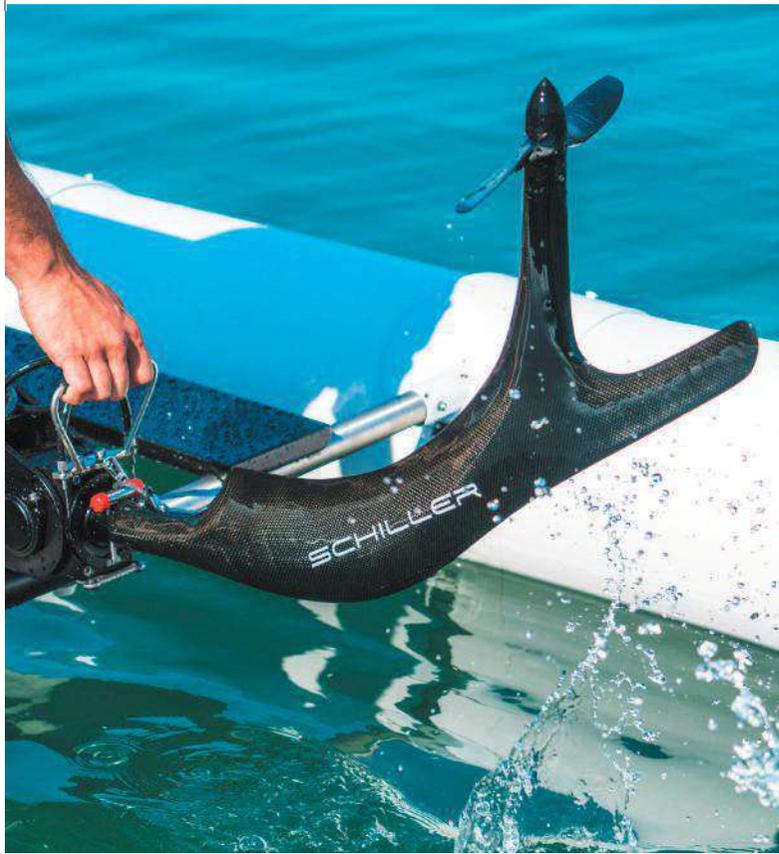

Designed & made in California the S1-C is silent, clean, and sustainable.

Frame is 2" in width, supports up to 400lbs

Less than 10 minutes to assemble and disassemble

Small footprint allows for easy storage

S1-C transports on most vehicle bike racks & in trunks

ENGINEERED FOR SPEED

Engineered to transfer the maximum amount of human energy into speed on the water, the S1-C features a proprietary drive train, integrated steering and propulsion and Gates Carbon Drive belts.

With a 1:7.5 gear ratio, riders experience a high degree of thrust off the line and reach speeds of over 10 mph cycling across the water.

RESPONSIVE STEERING

Featuring integrated steering and propulsion, turning the S1-C is as easy as turning the handlebars. Riders can easily navigate in and around small areas and sensitive marine habitat. Reverse pedaling allows for three point turns.

BUILT TO TRAVEL

What kind of water craft can you take in your car, take on an airplane and store in compact storage areas at home or on a yacht? The S1-C's compact frame and modular design allows you do all three.

We designed the S1-C to go from land to water in under 10 minutes.

SUPPORTS UP TO 400lbs

The 2" thick frame, holds up to 400lbs.

QUICK ASSEMBLY

Less than 10 minutes to assemble and disassemble.

EASY TO STORE

The S1-C allows for easy storage.

TRANSPORTABLE

Our bicycles can be transported within most vehicles without the need for an exterior rack...

Specifications subject to change without notice.

DESIGNED FOR **MAXIMUM FUN.**

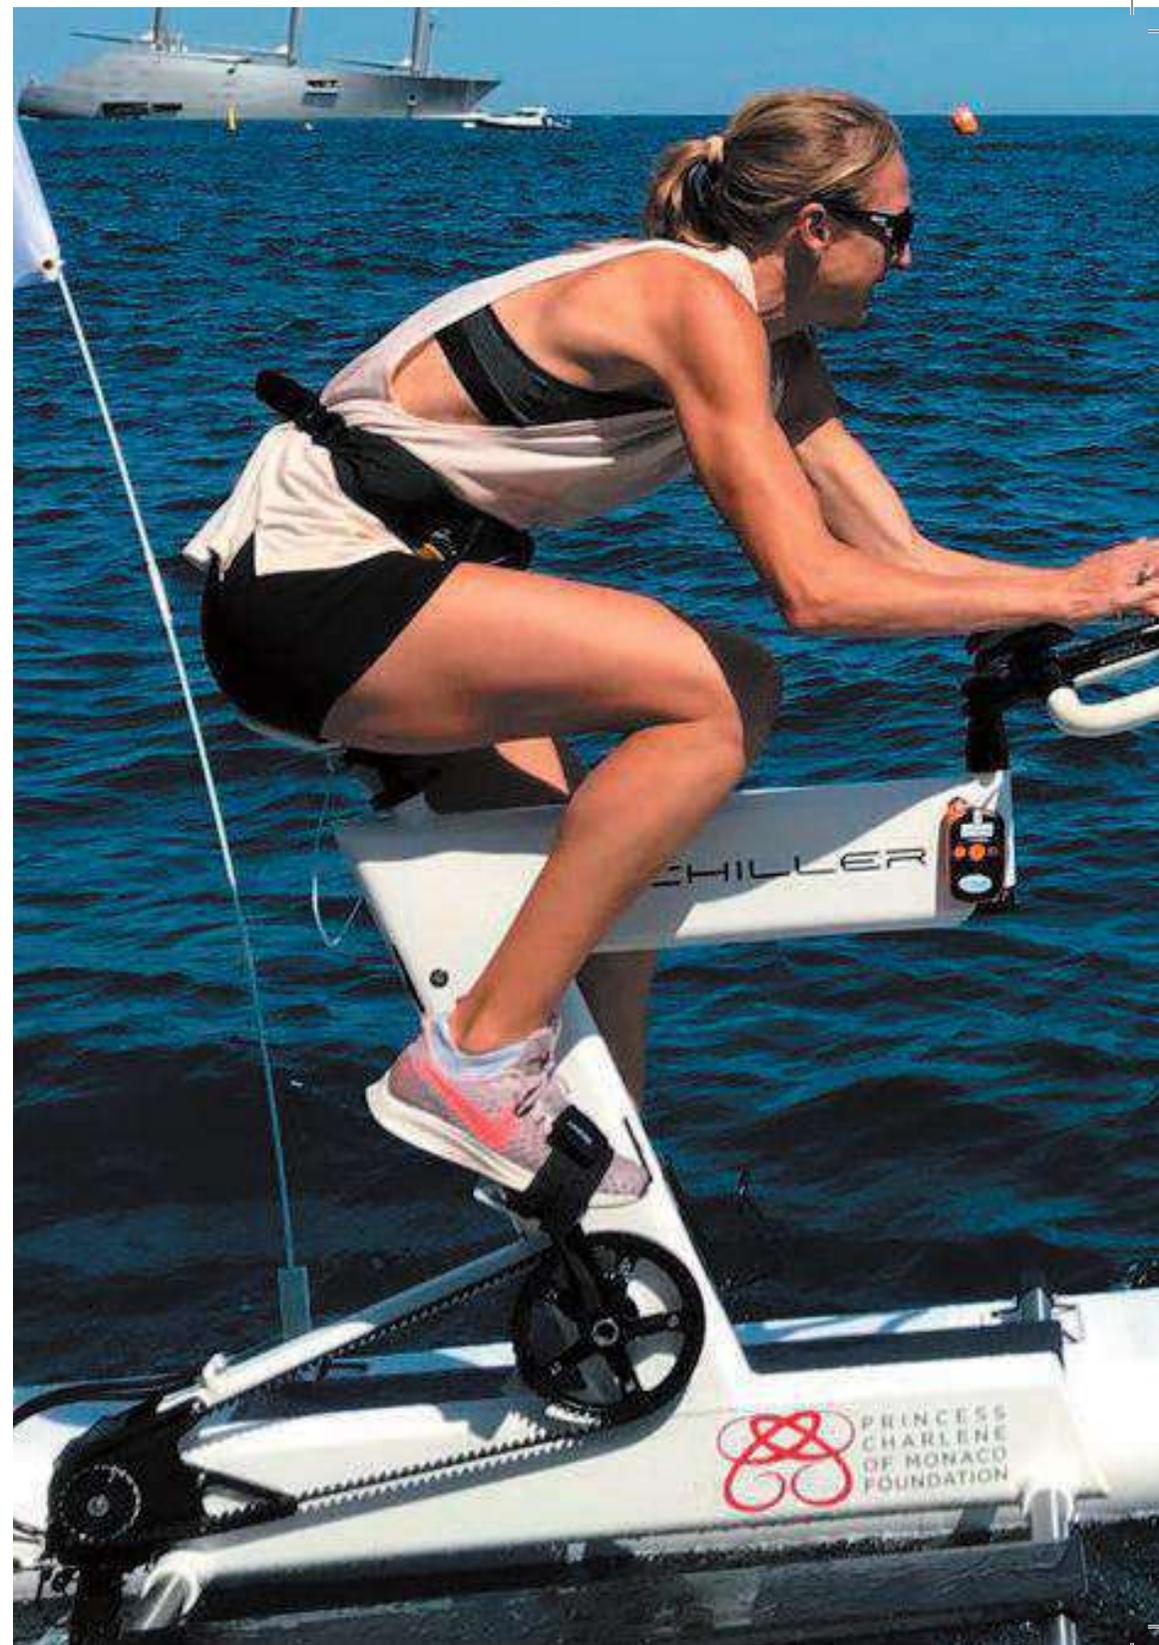

Riding a water bike has never been so fun and easy. It is part of what defines the Schiller Bikes experience. Anybody, independent of ability and the sports practised, can go for an incredibly fun ride in the water.

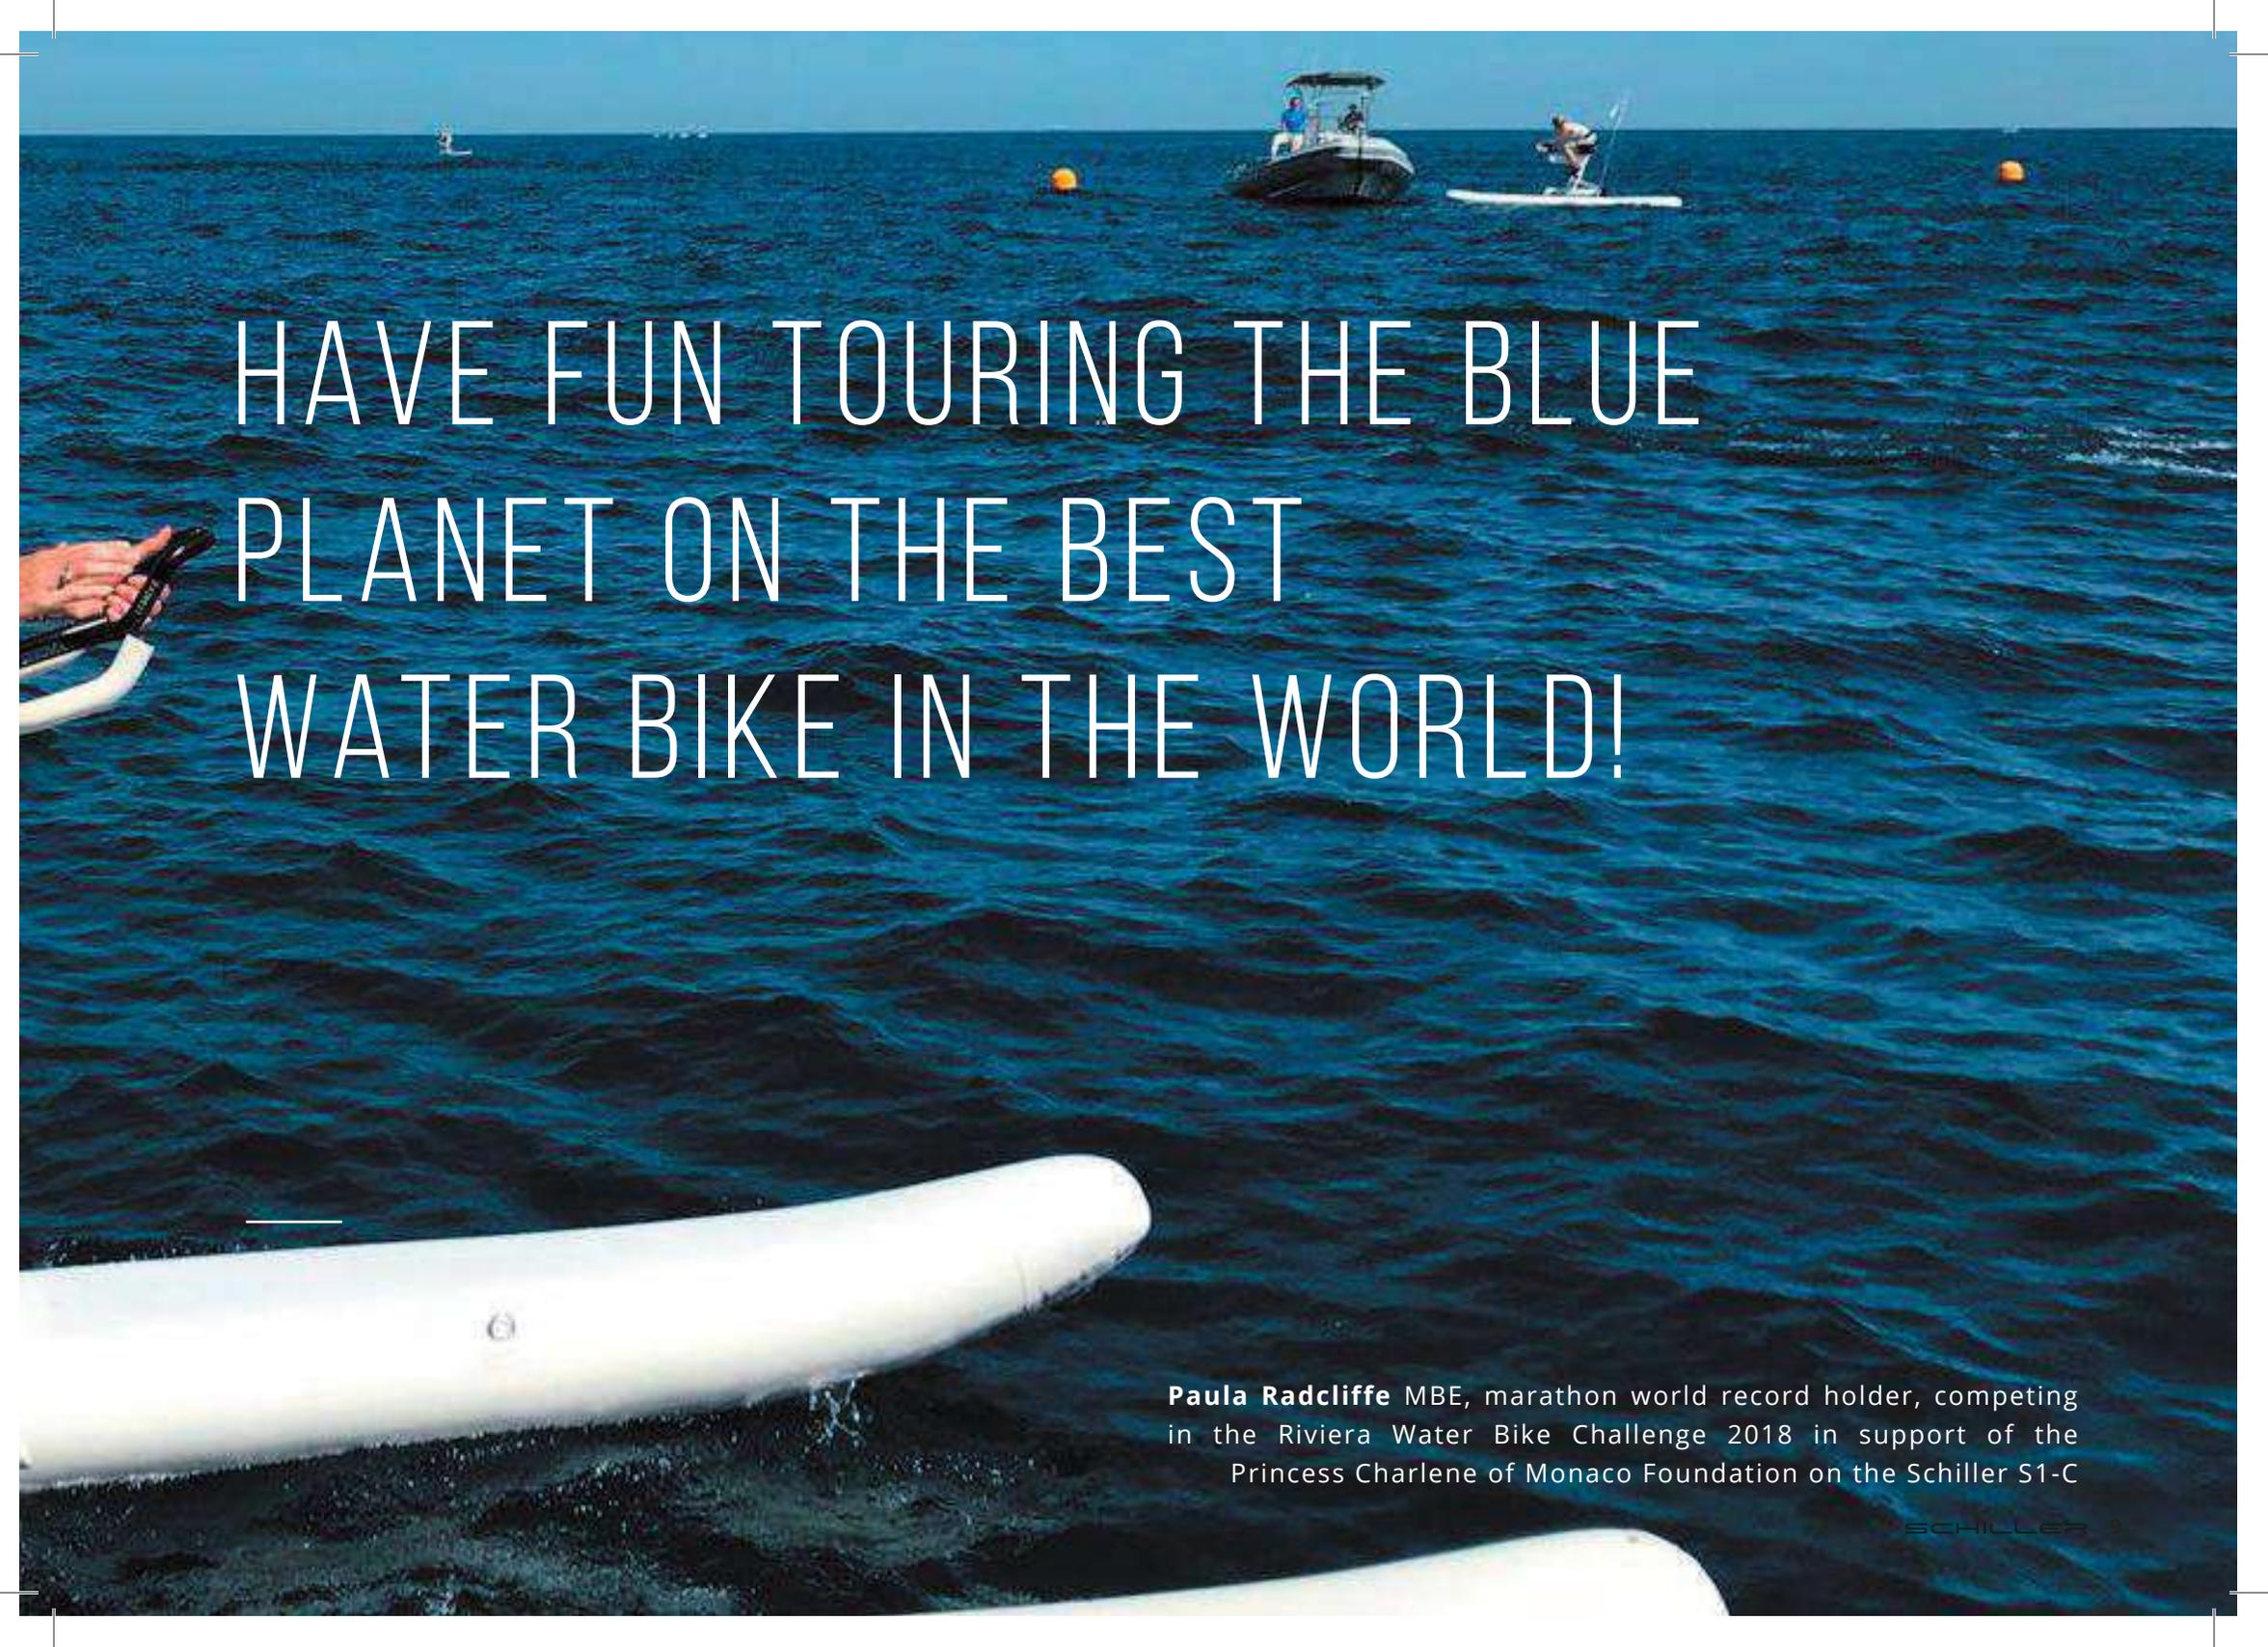

Unlike other motorized watercraft such as wave runners, the Schiller bike is a 100% human powered vehicle requiring no fuel and having zero emissions or impact on the environment. They are silent in motion and do not require a trailer for transport.

A NEW FRONTIER

The Schiller S1-C is the next frontier in biking and water sports. One that has no learning curve (or paddles or uncomfortable seating in kayak hulls), and is accessible to all for fun, fitness, touring and adventure on almost any body of water.

Safe and stable in open water; riders can jump straight on the bike, no training needed. No helmets, no paddles and no limits to exploring any aquatic paradise.

DISCOVER SCHILLER AT SOME OF THE BEST RESORTS AROUND THE GLOBE

TAKE YOUR SCHILLER TO A WHOLE NEW LEVEL

Leave the trails at the water's edge and explore a whole new world on your Schiller S1-C. Ride year round for fitness, fun, exploration and adventure. More than just a water bike, the S1-C is your personal floating platform. Whether its casting out with your fishing rod - sitting or standing - swimming out for a snorkeling adventure, bird watching, taking photographs of the coastline, or just laying back on the pontoons for a relaxing time on a sunny afternoon, the S1-C is the world's most dynamic human powered watercraft.

ACCESSORIES
