Performance defined

RÄVIK

# The RÄVIK

Awake RÄVIK is developed and assembled in Limhamn, southern Sweden by a dedicated team of senior mechanical- and electro engineers, product designers, and production industry professionals. The common goal; to deliver a healthy dose of exhilaration and adrenaline thanks to unmatched power and performance. All this within a clean and elegant body.

# The Awake Experience

The Awake Experience symbolizes the impact that the RÄVIK has on the rider – a perfect balance of exhilaration, adrenaline, and power.

By adjusting the output power in the Awake mobile app, the board is easily adapted to beginners as well as experts.

## Scandinavian heritage

Awake design is a leading Scandinavian expression of power and agility within a clean and elegant body. Attention has been given to features which ensure ease-of-use without compromising the thrilling riding experience.

The result is an aggressive machine made with the user in mind, infusing technical advancements with attractive looks.

## Design by engineering

Crafted from high-end composites, the RÄVIK challenges the user with aggressive power.

The slim rear offers rapid response and high agility, while the streamlined body design is sculpted with acute attention to hydrodynamics.

The RÄVIK is built for superior acceleration, sharp corners and, fast straights. From nose to nozzle, it's a purpose-built speed machine.
